# Chapter 1

## AI in public discourse paper template

Tobias Thelen, Another Author & Yet Another Author

Write an abstract that summarizes your paper. It's important to understand that an abstract is not a teaser but includes results.

**Keywords:** Provide 3-5 comma-separated keywords that are specific to your chapter

### 1 Introduction

Explain the topic of your paper and the background. Define the field of your review and clearly describe what's included and what's not.

Use blank lines to use paragraphs. There's hardly ever a reason to use explicit line breaks.

No indentation after figures and tables. Always refer to figures like figure ?? with proper ref commands.

You can refer to other chapters in the book by using their label. Example: Chapter ?? discusses the topic of biases in greater detail.

### 2 Methodology

A good source for understanding systematic literature reviews is **zawacki2019systematic**. Important: References have to be done via files. Use `citet` if the author name is part of your sentence and only the year and pages have to be put in parentheses. Use `citep` if both author name and year and

*Change with "papernote*

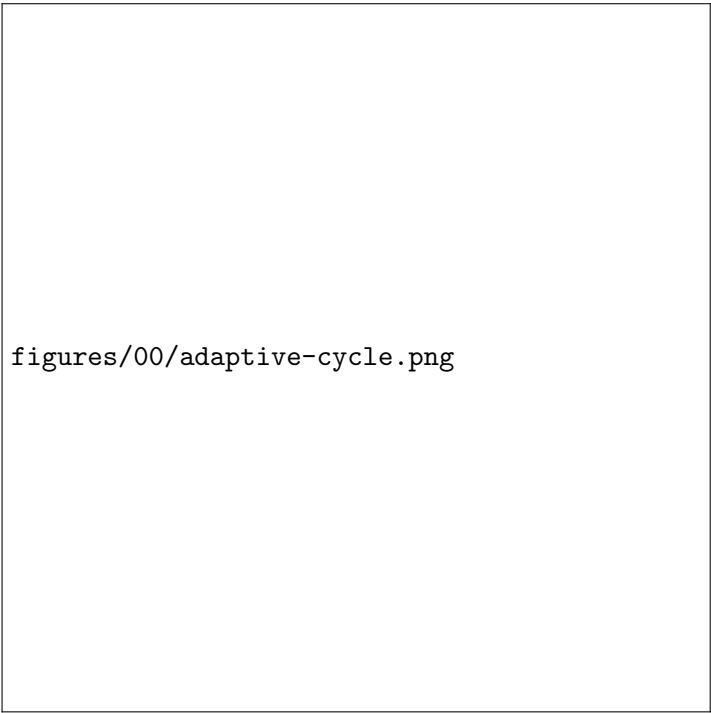

Figure 1: A figure with a caption (**parasuraman’model’2000**)

pages have to appear in parentheses. Observe the difference of `citet` and `citep` here: **zawacki2019systematic** vs. (**zawacki2019systematic**) or (**andre2017**).

Table 1: This is a table

Numbers=Monospaced,Lining	some text	some text
	some text	some text
	some text	some text
	some text	some text

Tables and figures will not always be placed exactly where you put them. This is the normal behaviour of  $\text{\LaTeX}$  that adheres to typography rules. Don’t try to work against that. And of course, reference your tables in the text, like here: see table `??`.

## **2.1 No single subchapters**

Important: You must not introduce single subchapters or subsubchapters. So, if you have a subchapter 3.1, you must also have 3.2. This subchapter is wrong.

## **3 Results**

This is the main chapter of your paper.

### **3.1 Description**

In a subchapter like this you could give some descriptive accounts of your findings like in which journals the papers appeared, in which years they were published, what the origin and disciplines of authors are etc.

### **3.2 Further findings ...**

Find an appropriate structure for your chapters and subchapters. The template just gives hints.

## **4 Conclusion**

What's your conclusion? You may also include your own opinion and judgments here, but clearly mark them!
